Wednesday, August 1st
5:00 - 6:30pm
Stone Soup ~ 4 King Street

A presentation and discussion about environmental injustice in New Orleans and Worcester, and about work that is being done to fight it. The unequal social effects of lead contamination, toxics, wetland destruction and flood damage shall be investigated. Why are some groups in the community more susceptible to environmental threats than others? How can we make the whole community healthier and safer?
